	Primary Examiner, Art U	Jnit 2175	

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's primary argument is that Muschetto and Kanevsky do not teach the steps (b), (c), and (d).

The examiner does not agree for the following reasons:

During patent examination, the pending claims must be "given >their< broadest reasonable interpretation consistent with the specification." > In re Hyatt, 211 F.3d 1367, 1372, 54 USPQ2d 1664, 1667 (Fed. Cir. 2000). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant always has the opportunity to amend the claims during prosecution, and broad interpretation by the examiner reduces the possibility that the claim, once issued, will be interpreted more broadly than is justified. In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-51 (CCPA 1969).

In this case, the combination of Muschetto and Kavevsky teaches the steps of:

(b) ordering each of the plurality of sets of user interface elements into an sequence (Muschetto, in fig. 17 and 18, col. 6, lines 41-62 and col. 7, lines 1-21, show that hierarchical structure provides ordering of UI elements. In col. 14, lines 1-5, Muschetto also shows ordering of UI elements by Z-order. In addition, Kanevsky teaches arrangements of UI elements within a web page (i.e. an archive file), see Fig. 1, col. 3, lines 20-52, col. 9, lines 30-45, and col. 10, line 52-col. 11, line 12)

(c) guerying each of the plurality of sets of user interface elements to select a plurality of

user interface elements for use in the user interface, the sets being queried in accordance with the ordering performed in step (b), wherein if more than one user interface element is associated

with the same region of the user interface then the selected user interface element is taken from the set of elements which occurs first within the sequence determined in step (b) (Muschetto, figs. 3 and 4; and col. 13, lines 61-col. 14, lines 5; which show the system of Muschetto querying the UI elements for display according to their hierarchical structure and Z-ordering)

(d) rendering the user interface in accordance with the plurality of user interface

elements selected in step (c) (in figs. 3 and 4, Muschetto shows displaying of UI elements). .
